Which is why we decided to include everything that was affected by climate as something that we can get involved in.

Other SDGs!?

Yes, thanks to climate we have opened the floor to manySDGs that have made a great fit when fighting for climate, by keeping in mind the gender equality and the respect of human rights when doing this, inaddtion to the youth voice..

MOTIVATION

Why these issues?

I have always had a huge interest in climate change and how this latter must be tackled by everyone

How I did it?

*Advocate for climate, spread awareness
Taking actions for climate change*

Challenges?

*Many policies made by governments..
Lack of awareness
Lack of engagement
Youth voice has been always excluded*

Actions that were taken to better fight our issue!

Solutions & actions

Results...

I had the chance to always get invited to different platforms where I represented the youth voice and its impact, where I inspired youth to have more goals in community service and be more interested in social work and problem solving, by speaking out and taking more actions.

**Another impact
we have made!**

We had the chance to convince more people to be more engaged in our coming activities both in YOUNGO (where I represented the Human Rights working group, as well as the Algerian youth who have been always dreaming of being involved but just didn't know?:

MY FUTURE GOALS

MY FUTURE GOALS

ORGANISATION

Where I can have the chance to bring more activities that have never been represented in both Africa as well my country

Fund others

I hope I will have enough power to support other youth who wants to impement the change that they want to see whether by funding them or supporting them with all what is needed

Grow my current initiative

By having more partnerships and expand our impact as African changemakers

Come up with more ideas...

We will come up with more ideas where we will be suggesting some more activities were youth can be involved more...

THANK YOU
